ACADEMIC PROJECTS & EXPERIENCE

Carbon Credit — VinHack'23 by VinnovateIT

(January 2023)

Team Bhagvan Bharose | Team Size: 4

A decentralized application that rewards users for producing energy via renewable sources. The d-App uses sensors or other monitoring devices to track the output of each user's renewable energy sources, such as solar panels or wind turbines and stores this data in a decentralized database.

Railway Operation Optimization System (Python)

(August 2021)

Developed a robust Railway Operation Optimization System in Python, integrated with a MySQL database containing simulated IRCTC railway information. Implemented secure user authentication with login and signup functionalities.

Third Eye for the Blind — Atal Tinkering Lab Project

(January 2021)

Team Size: 3

Pioneered the creation of a wearable technical gadget prototype designed to assist individuals with visual impairments. Utilized ultrasonic waves for obstacle detection, providing real-time feedback to users through vibrations and buzzer sounds.
